Jawa Barat, Kota Bekasi, Pondok Gede, Pura Melati Indah Blok L no 25

My name is Evan Varian Jonandha, currently a 3rd-year Computer Science student at BINUS University. I am passionate about software development, data science, and artificial intelligence, with hands-on experience in building web and mobile applications, developing machine learning projects, and working with data using Python and SQL. I am eager to apply my skills in a professional environment, contribute to meaningful projects, and continue developing my knowledge and expertise in the field of technology.

Education

Universitas Bina Nusantara - Jakarta

Sep 2024 - Sep 2028 (Expected)

Bachelor of Computer Science, 3.50/4.00

- Team Leader – Machine Learning (AI for Obesity Predictor)
 - Led a team of 3 students in developing an AI-based system for obesity prediction to raise public awareness of obesity.
 - Successfully achieved an A grade for the project.
- Entrepreneurship Course Project Leader (CEO)
 - Led a team project in a 2nd-semester entrepreneurship course, focusing on business planning and execution.
 - Achieved an A grade for project performance and overall Course.
- Team Leader – Research Paper on Measles Incidence Prediction
 - Led a team of 3 students in conducting research and developing a machine learning–based approach to predict measles incidence in tropical countries.
 - Managed task distribution, dataset preparation, model development, experimentation, and paper writing throughout the research process.
 - Compare Random Forest, Gradient Boosting, and ARIMA models using RMSE, MAE, and R² metrics, with Random Forest achieving the best overall performance.
- Database & Web Development Project – NutriScan
 - Collaborated with a team of 3 students to develop NutriScan, a food recognition and automated calorie estimation system.
 - Contributed to the design and development of the system, including the integration of food classification results with nutritional and calorie data.
 - Applied database management, web development, and machine learning concepts to build the overall system.
- Frontend Developer – TaskWeaver
 - Collaborated with a team of 6 students to develop an AI-powered project management platform focused on improving task distribution and team accountability.
 - Responsible for designing and developing the frontend interface, focusing on usability and user experience.

Organisational Experience

HIMTI

- Present

Activist

- Techfest 2025 — Technology Festival | Sponsorship Coordinator
 - Led the sponsorship team for Techfest, a national technology festival featuring TechTalk sessions and IT competitions for university students across Indonesia.
 - Successfully secured multiple industry partnerships through sponsor prospecting, outreach, and negotiation.
 - Managed sponsor communication, negotiation, and partnership coordination with external stakeholders.
 - Collaborated with internal divisions to align sponsorship benefits and ensure successful sponsor deliverables throughout the event.
- HIMTI Workshop 2025 | Technical Coordinator
 - Coordinated technical and logistical preparations to ensure smooth event execution.
 - Managed venue booking, equipment planning, and procurement based on event requirements.
 - Coordinated with internal divisions to ensure the availability and readiness of facilities, equipment, and materials.

Skills, Achievements & Other Experience

- **Soft Skills** : Communication, Teamwork, Time management, Creative, Initiative, Critical thinking, Responsible
- **Programming language** : C, Python, JavaScript , SQL
- **Databases** : SQL
- **Framework** : Streamlit, React, Node.js
- **Data and Software** : Machine Learning, Data Analytics , Backend Development, Frontend Development
